MASTERING AM: SHARING USER EXPERIENCE

WEDNESDAY 27TH MARCH 2019

09:00 - 16:30

The MTC Advanced Manufacturing Training Centre
Ansty Park, Coventry

REGISTER FOR FREE TODAY!

This event is free to attend, but registration is essential.
We only have limited places available, so book early to avoid disappointment.

PRACTITIONERS FROM ACROSS THE UK'S ADDITIVE MANUFACTURING (AM) SECTOR ARE INVITED TO SHARE THEIR KNOWLEDGE AND EXPERIENCE.

As the first in a unique series of events supported by the National Centre for Additive Manufacturing (NCAM), delegates will get the opportunity to learn how other AM users are addressing common challenges in application and development. Through a programme of workshops, leading AM users will discuss the practical approaches for the successful and safe industrial implementation of AM. During the event, AM users will be encouraged to openly discuss and share good practice for overcoming barriers which can prevent earlier adoption of AM technology.

Please note this event is for existing users of AM technology to learn from and share information with fellow AM practitioners. For those who are new to AM, we would recommend one of our AM training courses.

WHY ATTEND?

The programme of interactive workshops cover the following key areas and will also include practical advice on validation, certification, data management and skills development:

- ▶ Managing AM feed-stock
- ▶ Design for AM
- ▶ AM process simulation
- ▶ AM build process (polymer & metal)
- ▶ Part finishing
- ▶ Part inspection
- ▶ Certification & standards
- ▶ Health & safety
- ▶ Facility layout

HOW TO BOOK
